

# TERENINE COLOCATION

Increasingly, organizations are recognizing the benefits of colocating their mission-critical equipment within a data center. Colocation is becoming popular because of the time and cost savings a company can realize as result of using shared data center infrastructure. Significant benefits of scale (large power and mechanical systems) result in colocation facilities that offer a number of advantages over the traditional “in-house” data center. With IT and communications facilities in safe, secure hands, telecommunications, internet, Application Service Providers (ASP) and content providers, as well as small, medium, and large organizations enjoy less latency and the freedom to focus on their core business.

Terenine Colocation services offer the widest array of “shared” IT infrastructure options possible. From the most basic “rackspace” solution to the most complex combination of storage, security, redundancy, and bandwidth requirements, Terenine is able to meet your most demanding needs. As one of only a few Tier III certified Data Centers in the entire region, we can offer levels of redundancy and availability typically only found in the largest enterprise operations. And, at a significant cost savings to our customers with no sacrifice in service levels.

## TERENINE COLOCATION CUSTOMERS HAVE ACCESS TO OUR ENTIRE PORTFOLIO OF SERVICES INCLUDING:

- TIERED STORAGE SOLUTIONS
- SCALABLE NETWORK BANDWIDTH
- BACKUP SERVICES WITH ENCRYPTION OPTIONS
- 24 X 7 TECHNICAL SUPPORT
- TIER III CERTIFICATION
- TEREVAULT *(a new level of colocation never before seen in the industry)*
- SECURITY SOLUTIONS
- MANAGEMENT OPTIONS

We’ve spent the money (so our customers would not have to) to build world-class, enterprise-level solutions that provide our customers a wide range of options and flexibility in their IT investments. Make your investment wisely... choose Terenine!

## THE TERENINE VALUE PROPOSITION

Terenine delivers enterprise-level solutions at small business prices. Our solutions are designed with your needs in mind to help you align our technology with your business goals. We won’t sell you more than you need, but we’ll give you more than you expect.

## SUPPORT

You're 1,000 miles away and you get an alert that your server's RAM has gone bad. A quick call to our Support Team and your business is operational again. Or go one step further and let our predictive monitoring handle that phone call for you. The big boys sent support to India, but we're the guys who brought it home.

- 24/7 MONITORING
- 24/7 REPORTING
- REMOTE HANDS

## TEREVAULT

Like a bank vault, but up to Terenine data center standards. Whether you need a Tier III certified environment, your own reinforced, nearly bomb-proof data center, or just an incredibly secure and physically resilient place to put your data, we've got you covered.

- TIER III VAULT/BUNKER
- SECURED PRIVATE ENTRY
- SINGLE/MULTI TENANT OPTIONS
- UP TO 264 "U" PER SUITE

## TIERED STORAGE

You need lightning-fast storage. You need inexpensive mass amounts of storage. And don't forget, you need resilient yet inexpensive storage for long-term data retention and backups. We expect that, and we also expect to provide you with more value than you expect from anyone else.

- HIGH PERFORMANCE FIBER CHANNEL
- HIGH AVAILABILITY/MULTI SITE DATA REPLICATION
- MASS NEARLINE STORAGE
- DATA DEDUPLICATION
- ENCRYPTED TAPE BACKUP

## TIER III

All of our equipment is based on the highest industry standards, including one of the few certified Tier III data centers in the Southeast guaranteeing Uptime Institute verified quality of service.

- N+1 HVAC
- N+1 UNINTERRUPTIBLE POWER SUPPLIES
- N+1 ELECTRICAL
- EDS
- ITS

## NET SERVICES

WAN acceleration, advanced load balancing systems, IDS/IPS, web content filtering, ARE application, and system verification aren't always offered by service providers. With us, they are.

- WAN ACCELERATION
- WEB ACCELERATION
- NETWORK LOAD BALANCING
- ELECTRONIC APPLICATION VERIFICATION
- SCALABLE BANDWIDTH
- FULL MESH BGP

## SECURITY

Reinforced concrete walls, state-of-the-art IDS/IPS and firewalling systems, and 24/7 on premise, security teams is our way of ensuring your secrets and confidential data stay secret and confidential.

- VIDEO MONITORING/ACCESS
- 3-LAYER AUTHORIZATION
- SECURITY OPERATIONS CENTER
- INTRUSION DETECTION SERVICES
- INTRUSION PREVENTION SERVICES

## MANAGEMENT OPTIONS

- NOC SERVICES
- MONITORING OF CRITICAL ASSETS
- MONITORING & MANAGEMENT OPTIONS
- ALERT NOTIFICATION
- REPORTING
- SLA OPTIONS
